

Container - MB9

Stackable steel container

The Goodpack MB9 is a multimodal container intended for use in transport and storage of payloads ranging from liquids and pastes to bales and solids.

The MB9 is a galvanized steel container, which can be stacked both empty and laden, as well as collapsed when not in use. The construction ensures efficient protection against shocks, rough handling and contamination. The MB9 is safe, easy and quick to both assemble and disassemble by a single individual.

The MB9 offers easy handling with 4-way forklift entry, removable sidewalls (long side 14.9 kg) and a rugged build. It is used extensively for shipping industrial components, chemicals and foodstuffs in sea containers, trucks and rail cars.
